Our industry can deliver the cleanest, most cost-effective and energy-secure solution for America's future, but electrification proponents want to put us all out of business today. To stop them, we will need every tool in our toolkit: advocacy, communications, education, and more. The industry's Survive & Thrive Fund launches later in 2022, but our frontline defenders can't wait until then. Help us bridge the gap by making a generous contribution now.

One of the biggest heating fuel distributors in the Northeast has pledged to match all retailer donations up to \$50,000. Now it's your turn! Are you up to the challenge?

THE COST OF DOING NOTHING FOR THE LIQUID HEATING FUEL MARKET

The residential liquid heating fuel market shrank by 25% over the past 10 years. This is but a preview of what could come next as the "electrify everything" threat intensifies. The utilities and their allies drove away a quarter of our customers last decade. Now, they're coming for the rest. Knowing this, how can you afford not to act?
