

# Advocacy Fund Challenge 2023 Contribution Form

Complete the form below or  
donate online at [nefi.com/donate](https://nefi.com/donate)

Our Main Street businesses are delivering the cleanest and most cost-effective, secure, and reliable solution for America's energy future, but "electrify everything" zealots and their allies in every level of government are trying to stop them. To combat this, we will need everything in our toolkit: advocacy, communications, education, and more. Your generous support for 2023 Industry Advocacy Fund is vital to keep us in the fight!

One of the biggest heating fuel distributors in the country, has pledged to match all retailer donations up to \$50,000. Now it's your turn! Are you up to the challenge?

I am a: ☐ Vendor to Heating Fuels Industry

**NOTE:** The NEFI Advocacy Fund is not a political action committee (PAC). It is a non-partisan fund to help the industry meet high costs associated with ongoing advocacy and communications efforts and the development of regulatory compliance resources and programs. These contributions are NOT used to support politicians, political parties, or candidates for office. Business contributions are accepted and 75% is tax deductible as a trade or business expense under IRS Sec. 162(e). The remaining 25% of your contribution will be used for lobbying and related expenses and is therefore not tax deductible. If you have questions or concerns email [nefi@nefi.com](mailto:nefi@nefi.com) or call (617) 924-1000.

## Vendor Supporting The Liquid Heating Fuels Industry Advocacy Fund Challenge

Consider your budget for research & development, and advertising. Government policies are encouraging Electrification at OUR expense. Please consider a similar investment in our Advocacy Fund Challenge to preserve your business and with renewables in our near future, expand your business into the decades ahead.

# THE COST OF DOING NOTHING FOR THE LIQUID HEATING FUEL MARKET

The residential liquid heating fuel market shrank by 25% over the past 10 years. This is but a preview of what could come next as the "electrify everything" threat intensifies. The utilities and their allies drove away a quarter of our customers last decade. Now, they're coming for the rest. Knowing this, how can you afford not to act?
